

Windows NT and HP-UX System Administrators How-To Book (HP Professional Books)

86170-8 The best of both worlds from a trusted expert. This book is intended as a general blueprint for system administration on Windows NT and HP-UX. Starting with the basics-loading the operating system-HP veteran Marty Poniatowski outlines the basic tasks that 90% of all sys ads will need to perform regularly. Separate chapters for each operating system allow you to follow only the specific instructions you need, while umbrella chapters discuss interoperability and networking for both systems. Clear, structured materials cover:

- *Interoperability between HP-UX and Windows NT.
- *Setting up your system.
- *File system layout and management.
- *System Administration Tools (NT) and System Administration Manager (HP-UX).
- *Performance overview.
- *NTs User Environment and HP-UXs Common Desktop Environment (CDE).

This book will get you up and running fast, and remain a valuable, easy-to-use reference for every system administrator.
