

Algorithms and Data Structures: Third Workshop, WADS 93, Montreal, Canada, August 11-13, 1993. Proceedings (Lecture Notes in Computer Science)

The papers in this volume were presented at the Third Workshop on Algorithms and Data Structures (WADS 93), held in Montreal, Canada, August 1993. The volume opens with five invited presentations: Computing the all-pairs longest chains in the plane by M.J. Atallah and D.Z. Chen, Towards a better understanding of pure packet routing by A. Borodin, Tolerating faults in meshes and other networks (abstract) by R. Cole, A generalization of binary search by R.M. Karp, and Groups and algebraic complexity (abstract) by A.C. Yao. The volume continues with 52 regular presentations selected from 165 submissions, each of which was evaluated by at least three program committee members, many of whom called upon additional reviewers.
