

Oracle E-Business Suite R12 Core Development and Extension Cookbook

Building extensions in Oracle E-Business Suite is greatly simplified when you follow the step-by-step instructions in this book. Whether novice or pro, this is a great tutorial with over 60 recipes and stacks of screenshots. Overview Gain key skills learning to extend Oracle E-Business Suite Release 12 Build forms with advanced features and deploy them in the application Create personalizations and understand how to modify functionality through them Step by step examples guiding you through the development process What you will learn from this book Get an overview of the architecture of Release 12; learn about the file system and where files need to go. Configure concurrent programs which launch executable programs such as a database package or a host program. Understand how to write to a concurrent program log, and output files. Add a query screen to forms and learn how to pass parameters. Configure forms in E-Business Suite, create functions and add them to menus. Create tabs and add code to control them. Create items with lookups, use widgets for date fields and add drop down lists Build a fully working form with most of the components you are ever likely to utilize. Understand the personalization screen. Change properties to hide fields and move them around. Change labels and even alter a list of values. Create personalizations to perform validation and display a message. Perform actions such as launching a form, adding items to menus or icons to toolbars. Understand Oracle workflow and create a workflow that is triggered by a business event from an XML message on an advanced queue. Build a workflow with functions, lookups, sub-processes and notifications. Learn how to deploy a workflow and test it - viewing its status and monitoring progress. Approach This is a practical, hands-on book providing in depth tutorials on each topic. It is full of step by step examples of

the key points for each subject to give a
