

# Getting Started with the Graph Template Language in SAS: Examples, Tips, and Techniques for Creating Custom Graphs

This book will get you started building graphs immediately and will guide you toward a better understanding of the Graph Template Language (GTL), one step at a time. It shows you the most common approaches to a variety of graphs along with information that you can use to build more complex graphs from there. Sanjay Matange offers expert tips, examples, and techniques, with a goal of providing you with a solid foundation in using the GTL so that you can progress to more sophisticated, adaptable graphs as you need them. Ultimately, Getting Started with the Graph Template Language in SAS allows you to bypass the learning curve. It teaches you how to quickly create custom, aesthetically pleasing graphs that present your data with maximum clarity and minimum clutter.
